TARIFF SCHEDULE FOR HOME NURSING CARE

The Home Support team, composed of caregivers, community healthcare assistants, personal healthcare assistants and nurses, takes care of patients in the short and long-term contexts.

These concepts are crucial and will be included in the SERVICE OFFER because the amount of patient's insurance coverage will differ here.

The time estimate listed on the OPAS sheet will be attached to the service offer and translated into the predicted monthly cost.

In long-term care, a complete assessment of healthcare needs may be required (e.g. for RAI home care).

RATES :

The patient's obligatory health insurance is supplemented by cantonal financing and patient participation to cover any outstanding costs.

In order to operate with full transparency in the inter-cantonal framework, we decided to align ourselves with the AI, AA and AM pricing models that entered into force on January 1st, 2019. As a result, our prices are now as follows :

OPAS A	114.96 CHF / hour
OPAS B	99.56 CHF / hour
OPAS C	90 CHF / hour

INVOICING AND PAYMENT:

SITEX sends invoices to patients, with exceptions for special agreements with the insurance provider.
